

*Are we fulfilling the demands of
the pet owners?*

Do we breed for health, good temperament and looks?

This has always been our intention, but are we also considering our responsibility after the sale?

Are we giving **After Sales Service** ?

Not nearly enough

We all keep in touch with the owners of
very promising puppies

but not

with owners of less promising or
problematic puppies !

So what can we as Breed
Supervisors do?

What do we want to achieve:

- Public awareness to the care taken of raising puppies
- To ensure breeders selling healthy puppies to the Public
- Having the required knowledge for breeding excellent dogs
